

CaBA DataV5, NFM & Natural Capital. More demo than ppt!

Dave Johnson, Michelle Walker &
Anneka France

CaBA Desktop package V5

New datasets

- CLAD
- LCM 2015
- Coal Authority
- Highways England
- Groundwater
- SAGIS
- WINEP

New groups of data

- Air quality
- Socio-economic
- Natural Capital
- As well as the old favorites

CaBA desktop package V5: What next?

- NO MORE DATA. (We are going to focus on building our capacity to use what we already have.....)
 - Although the new data.gov is a bitch....
 - And we maybe doing a coastal data package....
 - And there's some great CSO/water company data on the way..
- So.....
- Basically expect V6 data package sometime in 2019....
 - We plan to do some webinars, if you are interested keep an eye on the NEW CaBA website....more later

CaBA Data: Long term aim part 1

- The Online data package and how to use it
 - As much of the new data as possible is now online
 - Within the desktop it is switched off by default....
 - Wherever possible we try to get it attributed to CaBA boundaries...
 - This means that it is up to date and ideal for Storymaps
 - We are planning more AGOL training to make sure everyone can update their storymaps..

CaBA Data: Long term aim part 2

➤ Local data collection and publishing

- This is all about making your data available too
- The NFM tool is one example, more in a bit....
- Riverfly.....
- Outfall safari.....
- Include into a Storymap and grow the 'Local Evidence Pack' for your partnership to plan their delivery around.....

Now some demos.....

Desktop data package. Dave.

Online data package. Anneka.

NFM tool & CaBA Website. Michelle.
