

Forest to Sea

*The next flagship project for
the Severn Vale Catchment
Partnership*

Aims of the project

- Linking the Severn Estuary with headwaters in the forest and create free flowing, wildlife rich landscape.
- Enabling us to get a better, more joined up narrative to give a better lever for funding, particularly for big funding bids.
- Delivering more objectives to meet individual partners objectives with support and buy in from the partnership.
- Part of a bigger environmental and social picture in the Severn Vale Catchment, contributing to shared aims and objectives.

Where to go from here?

- The first steering group meeting was held in February 2022.
- Focus and funding has been on the Wilder Frome project – aim to learn from this and create a vision and strategic action plan for Forest to Sea
- Need to bring together existing projects in the catchment and develop further ambitions.
- The next partnership meeting will be in the Forest of Dean.
