Stroud Valleys Natural Flood Management

We work with the community and local organisations to utilise nature based solutions to slow the flow, store water and improve infiltration in order to make catchments more resilient to floods and other environmental challenges.

STROUD DISTRICT COUNCIL

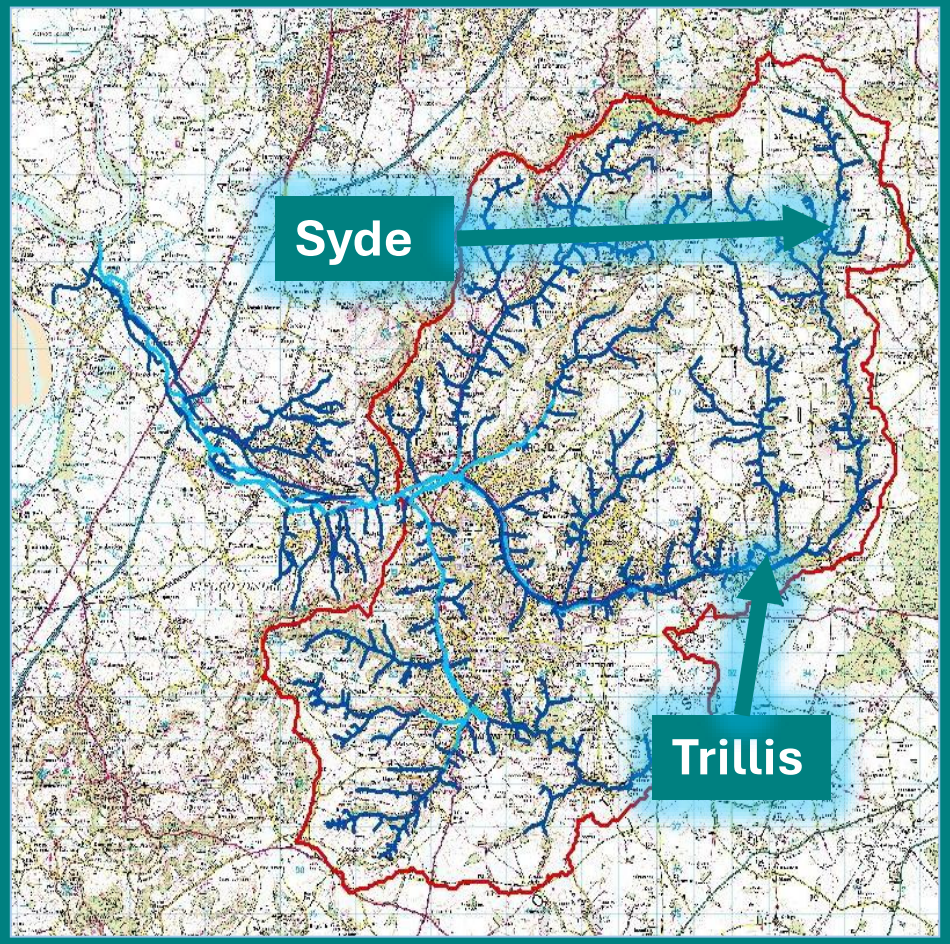
Stroud Valleys Natural Flood Management

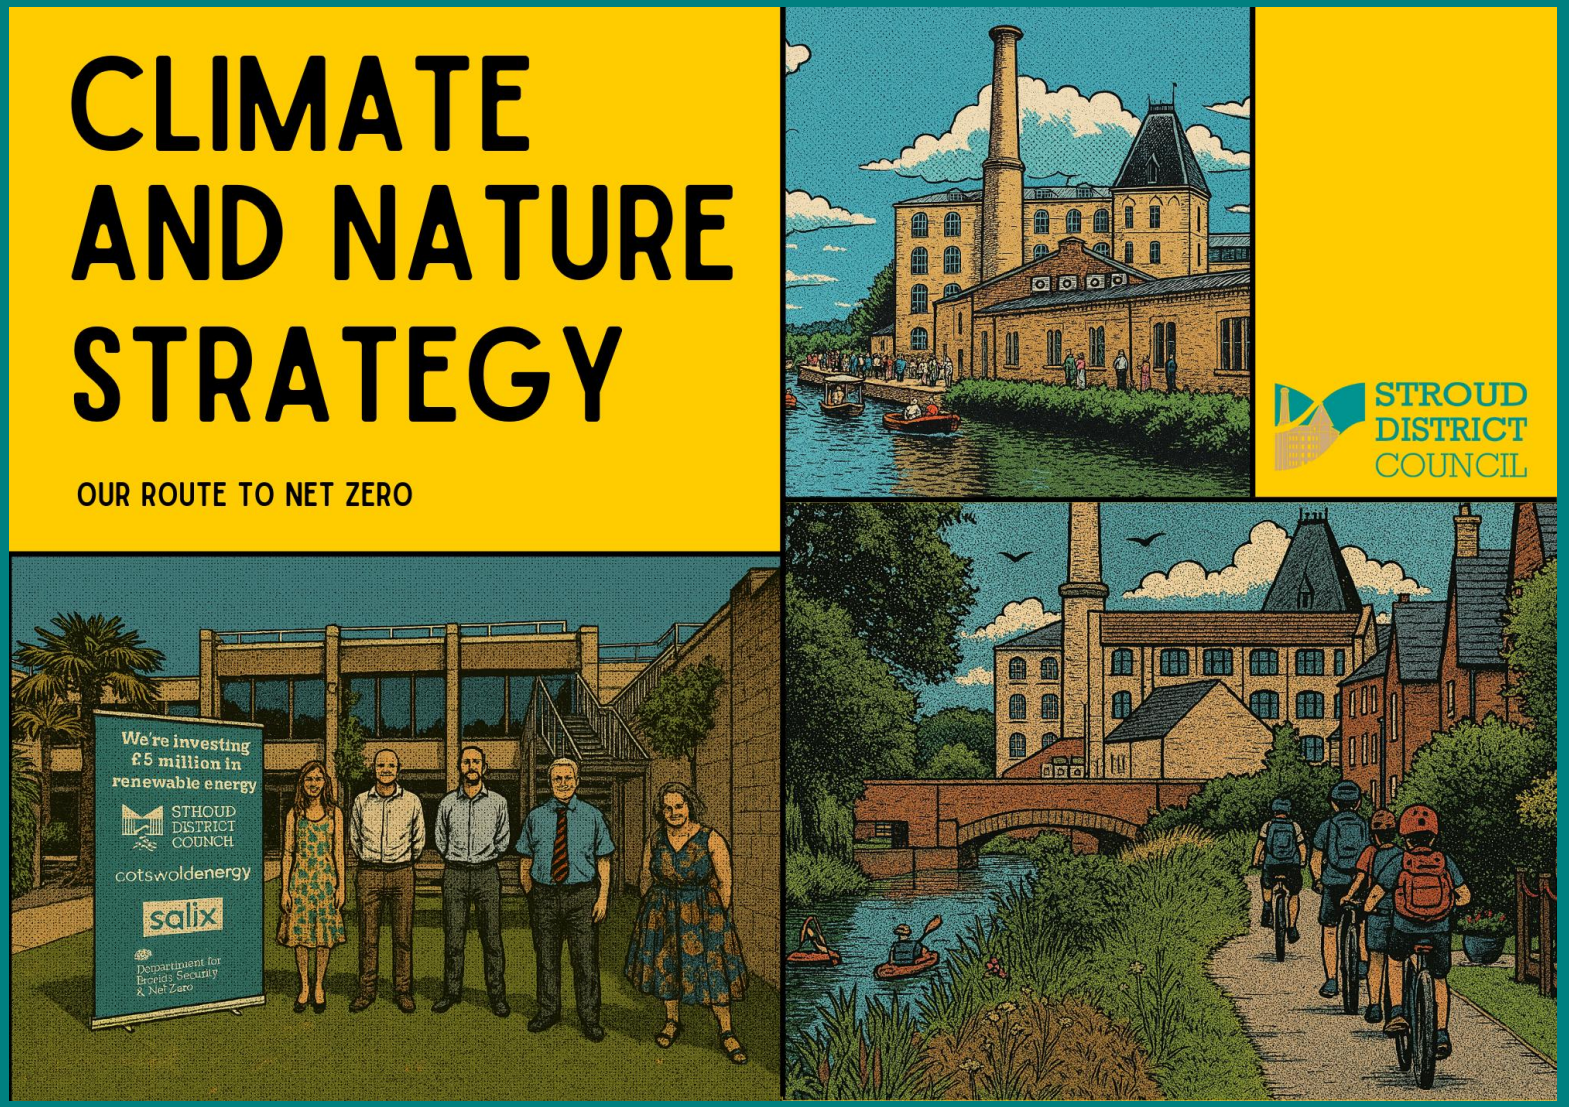
Significant projects completed this summer have included:



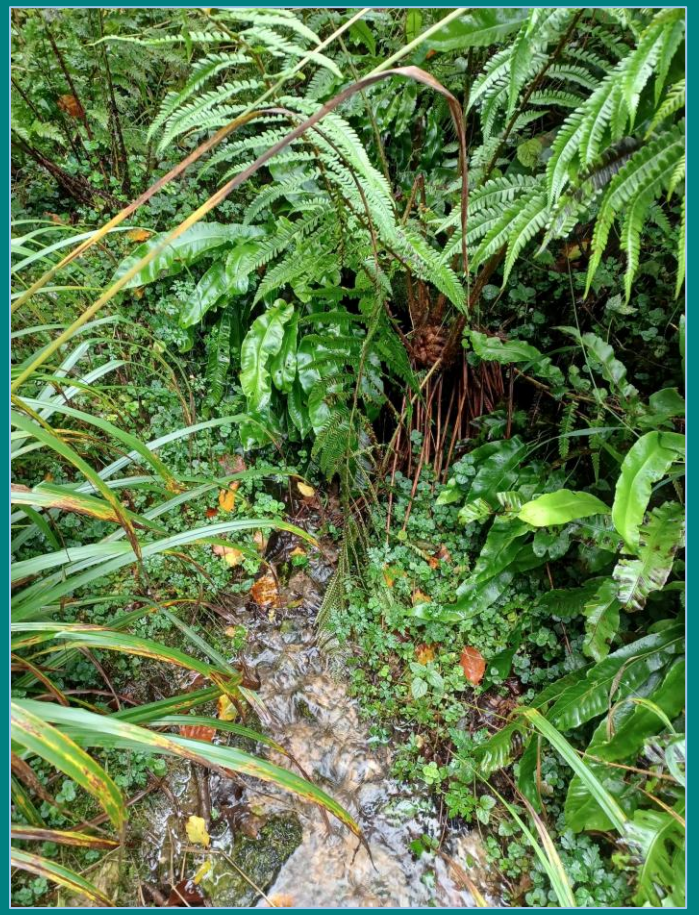
Trillis (Holy Brook, tributary of the Frome) and Syde (River Frome) River Restoration

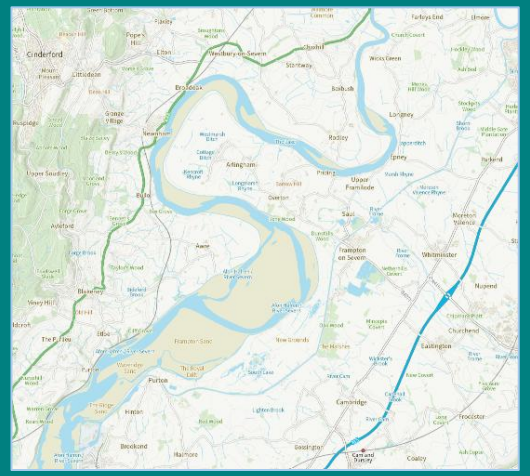
Please contact George.maslin@stroud.gov.uk for more information about these or other Natural Flood Management projects in the River Frome Catchment

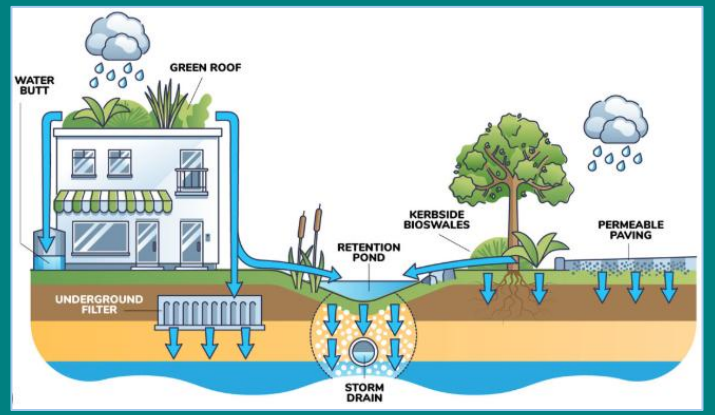
Climate and Nature Strategy



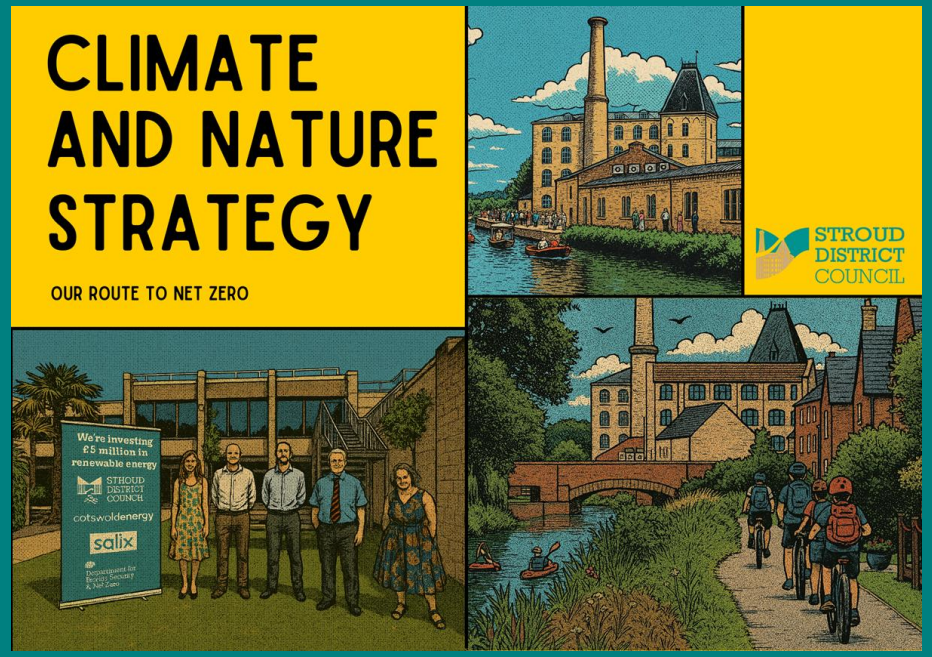
Draft Water, Rivers and Coast Strategic Objectives







How to send a consultation response

To review the draft strategy in full and send a response to the Climate and Nature Strategy consultation, please see: Draft Climate and Nature Strategy Consultation


The consultation period closes on 30/09/2025, so please send in your response before then.
